

FAASTeam & EA-63 FSDO presents:

Don't Get Caught Out in the Cold! Aviation Weather 101

Winter weather in New England can adversely affect flight operations. Poor weather conditions with fast moving fronts, strong and gusty winds, blowing and drifting snow, and icing conditions are just some of the issues that require careful planning in order to minimize their effects. So, how should you do your planning? Featured speaker William Babcock of the National Weather Service (NWS) will showcase the tools available to pilots to assist in winter flight planning. Don't miss this informative briefing specifically designed to help you make the best decisions for winter flying. Refreshments provided by Worcester Area Pilots Association (WAPA). If inclement weather is forecast for the seminar time, call 860-654-1039 for a status message.

Directions: Program held in the airport terminal building. Aircraft parking at Rectrix, auto parking in the terminal lot, first 24 hours is free.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafetyTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
